Education

Ph.D. in Computer Science (Sept 2019 - present)
University of Edinburgh, UK
Thesis: Hardware-Assisted Distributed Dependable Systems, **Microsoft Research PhD Fellow**
Advisor: Prof. Dr. Pramod Bhatotia
Summary: Designed distributed systems for the untrusted cloud infrastructure with increased security properties and performance leveraging the recent hardware advancements in trusted computing (Trusted Execution Environments, e.g., Intel SGX, AMD-SEV), storage (byte-addressable storage) and networking (RDMA, direct I/O, SmartNICs). **Completed 4 first-author papers, 2 first-author paper acceptances (top tier) and 1 first-author best paper nominee.**

MSc in Computer Science (Sept 2018 - Aug 2019)
University of Edinburgh, UK
Best Performing Female MSc Thesis Award

MEng in Computer and Electrical Engineering (Sept 2012 - Mar 2018)
National Technical University of Athens (NTUA), Greece

Employment

Microsoft Research, Cambridge, UK Sept 2021 - Dec 2021
Research Intern
Developed a new high-performance Key-Value store system that shields against privileged timing attacks on top of the standardised threat model in confidential computing. Built on top Trusted Execution Environments (Intel SGX) and state-of-the-art networking techniques (RDMA).

University of Edinburgh, UK June 2023 - present
Research Assistant
Designed and built a Hardware/software co-design of a trusted NIC architecture for robust replication in the cloud. Developed a simple and easily adaptable API for secure networking operations on top of FPGA-based SmartNICs.

Intracom Telecom, Athens, Greece Jul 2017 - Jul 2018
Software Systems Engineer
Developed a resource-aware infrastructure for the cloud-hosted data centers that optimises the provider's energy and maintenace costs while meeting clients SLAs. Built on top of Intel RDT technologies and Kubernetes.

Honors and Awards

Best paper nominee at DSN'22

Microsoft Research scholarship, 2019

Best Performing Female MSc Thesis Award for MSc thesis, 2019

Publications

Conference publications:

A Trusted NIC Architecture: Hardware architecture, networking stack, and its applications in building robust distributed systems protocols
Under submission

Using Modern Cloud Hardware to build Robust and Efficient Replication Protocols for Distributed Data Stores
Under submission

Anchor: Secure Persistent Memory Architecture
Dimitris Stravakakis, Dimitra Giantsidi, Maurice Bailleu, Philip Saendig, Shady Issa, Pramod Bhatotia
SIGMOD'24, Rank: A1

FlexLog: A Shared Log for Stateful Serverless Computing
Dimitra Giantsidi, Emmanouil Giortamis, Nathaniel Tornow, Florin Dinu, Pramod Bhatotia
ACM HPDC'23 [code], Rank: A1, Acceptance rate: 18.20%

Treaty: Secure Distributed Transactions
Dimitra Giantsidi, Maurice Bailleu, Natacha Crooks, Pramod Bhatotia
IEEE/IFIP DSN'22 (Best paper nominee) [code], Rank: A1, Acceptance rate: 18.20%

Avocado: A Secure In-Memory Distributed Storage System.
Maurice Bailleu, Dimitra Giantsidi, Vasilis Gavrielatos, Le Quoc Do, Vijay Nagarajan, Pramod Bhatotia
USENIX ATC'21, Rank: A1, Acceptance rate: 23.1%

DICER: Diligent Cache Partitioning for Efficient Workload Consolidation
Konstantinos Nikas, Nikela Papadopoulou, Dimitra Giantsidi, Vasileios Karakostas, Georgios Goumas, Nectarios Koziris
ICPP'19, Rank: A2, Acceptance rate: 20%

Talks

ACM HPDC'23, Orlando, US
FlexLog: A Shared Log for Stateful Serverless Computing

IEEE/IFIP DSN'22, Baltimore, US
Treaty: Secure Distributed Transactions

Third Annual SGX Community Day 2022 (virtual)

USENIX ATC'21 (virtual)
Avocado: A Secure In-Memory Distributed Storage System

Teaching experience and Supervision

Teaching assistant: Operating systems and Distributed Systems Engineering courses, University of Edinburgh and TU Munich, Dec 2019 - present.

— Operating Systems, University of Edinburgh, Semester 2 (Spring), 2019 - 2022

— Computer systems lab, Cloud-lab, Advanced systems programming, TU Munich, Winter and Summer Semesters, 2020 - 2023

BSc/MSc thesis advisor: Supervised 3 BSc and 2 MSc thesis in TU Munich, Dec 2020 - present.

Professional activities

Web chair: **EuroSys'21**

Shadow PC member: **EuroSys'23**, **SoCC'23**, **WWW'22**

Skills

Languages: C/C++, Python, Bash, Golang, Java, Vitis HLS

Systems and Tools: RocksDB and folly library, TEEs (Intel SGX, OpenEnclave SDK, AMD-sev), direct network I/O (DPDK, RDMA,Alveo SmartNICs), SPDK, Intel RDT, LLVM, collectd, POSIX/Unix, OpenMP and MPI, gRPC

Virtualization: KVM, Qemu/Libvirt, Docker, Kubernetes

Distributed Programming: Hadoop MapReduce, Socket and RPC programming
